DETAILED ACTION

Drawings

The examiner acknowledges the corrected drawings received on 10/28/05.

Specification

The examiner acknowledges the corrected title, abstract, and specification received on 10/14/05.

Claim Objections

The examiner acknowledges the corrections regarding objections to Claim 16.

Claim Rejections - 35 USC § 103

The examiner concedes to applicant's argument regarding the measurement of wavelength-dependent power changes (last paragraph on page 11 of applicant's remarks).

Allowable Subject Matter

Claims 16, 18, 20, and 22 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: claim 16 is allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious the use of a polarimeter for virtual power splitting as a means for determining chromatic dispersion together with the measurement of wavelength-dependent power and polarization changes, in combination with the rest of the limitations of claim. Claims 18, 20, and 22 are allowed because they depend on an allowed independent claim (16).
